**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1, 3, and 6-8 are allowed.

The following is an examiner's statement of reasons for allowance: the primary reason for allowance of the claimed invention is the inclusion of, among other things, the drawing transistor (Q4), being connected to the base of the driving transistor (Q3), for drawing a bypass current ( $I_{c4}$ ) from the driving transistor input current to reduce the driving current in response to the input signal, and wherein the bypass current increases when the control voltage increases. The best prior art of record (the applied references in the rejection) discloses an apparatus having a bias circuit. However, the bias circuit does not have the drawing transistor, which is connected to the base of the driving transistor, for drawing a bypass current, and wherein the bypass current increases when the control voltage increases. Thus, claims 1, 3, and 6-8 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Khai M. Nguyen whose telephone number is 571-272-1809. The examiner can normally be reached on 9:00 - 5:30 Monday-Friday.
